## Easy Marker EV & Easy Marker Up Automatic Marking Machines

These **automatic** sand-jet marking machines have been designed to be used in both **vertical** production lines (Easy Marker EV) and **horizontal** production lines (Easy Marker Up), and are suitable for serial production. The steel mask, on which the logo/mark is engraved, can be rotated and the position of the gun head can be adjusted by the operator – allowing the desired mark to be placed in different positions and at different heights. The gun head is oscillating, enabling this piece of equipment to be used with all types of vertical glass working machinery – bevelers, double edging machines, washing machines, tempering lines, etc. The Easy Marker speeds up the marking process and provides high quality engraving for a non-fading logo/mark.

Easy Marker EV – max marking area Ø of 25 mm .....EASYMARKEREV  
Easy Marker UP – max marking area Ø of 25 mm .....EASYMARKERUP
