

DON'T TAKE THE RISK

Only Woods Powr-Grip® has a safety factor rating that puts your safety first.
Nearly all other brands have no safety factor at all. What else have they compromised?
Trust the original, reliable choice of professionals: Wood's Powr-Grip®!

Average Pull Capacity at Redline

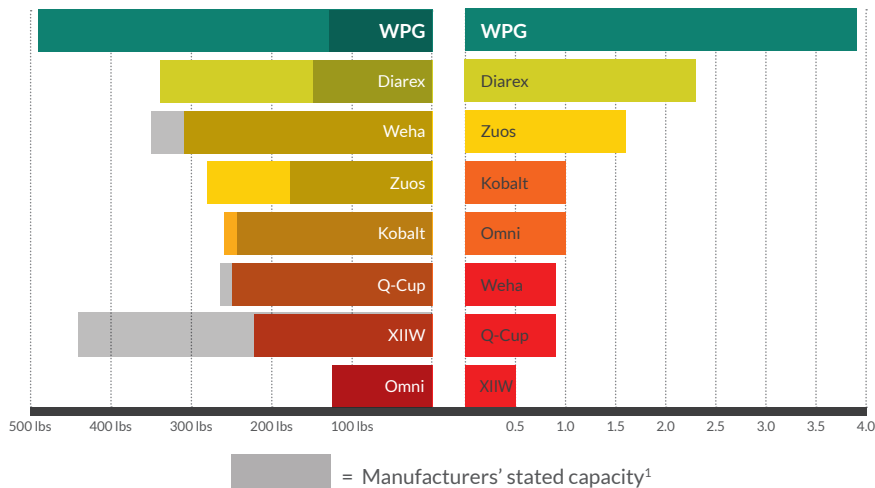

Vertical pull testing performed on WPG suction cups and other comparable brand cups under ideal conditions; real-world results will likely be lower.

Average Safety Factor Rating

The safety factor rating tells you how much stronger something is than it needs to be to stay safe. This protects users who lift loads in less than ideal conditions.

WOOD'S POWR-GRIP
SUCTION CUPS

VERSUS
OTHER BRANDS

THE POWR-GRIP® DIFFERENCE

60+ years of research and development

Limited research and development history

Engineered with user safety as the top priority

User safety not prioritized in design

Proudly made in Laurel, Montana USA

Manufactured outside the USA*

Network of local dealers and distributors

No established network of local dealers or distributors

Backed by warranty with easy access to support

Limited or no warranty; difficult-to-access support

Exchange program for select cup models

No exchange program offered

¹ Manufacturers' stated capacity for standard, 8" diameter hand cups ONLY. (Capacities vary among WPG cups with other dimensions, other features, and/or alternative rubber compounds. Do not attempt to lift any load that exceeds a WPG cup's stated capacity, regardless of model.)

* Exception: Omni Cubed suction cups manufactured in America

QUALITY & SAFETY
CONTINUE TO BE OUR TOP PRIORITIES!
